Chairman of the Board and
Chief Executive Officer

January 22, 2026

Dear Shareholders:

I am pleased to report that the Company delivered strong fourth quarter and full year 2025 results, continuing on our path to more historic profitability levels. Net income was \$29.9 million for the quarter, with earnings per share of \$12.26, and a return on assets of 1.11%. Full year 2025 net income and earnings per share totaled \$93.7 million and \$38.06, representing increases of 68% and 71%, respectively, from 2024. Net interest margin expansion was the main driver of improved year over year results, supported by outstanding loan growth of 7% for the year.

In the fourth quarter of 2025, profitability gains were driven primarily by continued expansion in net interest margin, which increased 22 basis points ("bp") from the third quarter and 79 bps from the fourth quarter of 2024. This improvement was achieved despite the Federal Reserve reducing rates by 50 bps during the quarter, as earning asset yields remained stable and we were able to reduce funding costs. Margin also benefited from the continued normalization of our balance sheet as lower yielding securities were replaced with higher yielding loans. This normalization translated to net interest revenue expansion of \$76 million or 27% for 2025 versus 2024.

Financial performance for the quarter and the year also benefited from net releases in our allowance for credit losses due to strong asset quality. In the fourth quarter, we recognized a net release of \$2.8 million from the allowance as we saw low levels of chargeoffs, slightly declining loan balances, and reductions in classified assets. For the year, we had a net release of \$2.1 million in the allowance mainly due to a \$7 million recovery in the third quarter from a previously charged off credit. Asset quality remains healthy, and our allowance for credit losses is ample at 2.10% of loans. Capital levels improved again during the quarter, with equity to assets increasing to 9.36%, up 14 bp from the prior quarter. A strong capital and reserve position remains foundational to our strategy, providing both protection against potential economic downturns and flexibility to support future growth.

Non-interest revenue totaled \$16.6 million for the quarter, consistent with the third quarter and up 3% from the fourth quarter of 2024. Fiduciary income and investment services fees continued to be the primary contributors to non-interest revenue. Card fees and deposit service charges also showed strong full year over year growth at 8.8% and 9.3% respectively. Operating expenses declined \$2.4 million during the quarter, largely due to a one-time \$6.5 million expense in the third quarter related to the settlement of a portion of the Bank's pension liabilities. Expense levels remain generally in line with expectations and reflect continued

discipline as we invest thoughtfully to support growth. Strong revenue growth along with measured expense growth combined to improve the bank's efficiency ratio by over 5% from 2024 to 2025.

Overall, the fourth quarter capped a very successful year as we continued to normalize the balance sheet and strengthen earnings power. As we look ahead to 2026, our core focus of disciplined loan and deposit growth, meeting our customers' needs, and investing for the future will continue. New locations across our footprint are beginning to mature, and we expect them to contribute meaningfully to growth and operating leverage over time. While economic and political uncertainty remains elevated, we believe the Company is well positioned to succeed in any environment.

Our customer-centric business model continues to attract and retain high-quality relationships, and our financial strength allows us to capitalize on opportunities as they arise. We remain focused on long-term value creation and disciplined execution on behalf of our shareholders. As always, we are grateful for your support and if we can help you in any way, please let us know.
